PRATHAMESH KOKKULA

Senior Full Stack Developer (MERN) | Mumbai, India

kprathamesh2001@gmail.com | +91 8779099074 | linkedin.com/in/prathameshkokkula | github.com/pk-062001 | Portfolio

PROFESSIONAL SUMMARY

Senior Full-Stack Developer (MERN) with 3+ years building and owning production B2B systems end-to-end — REST API architecture, MongoDB data modeling, React.js frontends, and AWS/DigitalOcean deployment. At BXI, I run the platform as the sole full-stack owner: multi-gateway payment integrations (Razorpay, Pine Labs, HDFC, Yes Bank, Juspay), JWT/RBAC authentication, real-time admin dashboards, and multi-channel notification systems, alongside cloud infrastructure and incident response. Comfortable driving decisions across the stack — from system design and API contracts to deployment strategy and production monitoring — with minimal oversight. Promoted to Senior Developer for consistently owning business-critical features independently.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, HTML5, CSS3, SQL, Bash

Frameworks & Libraries: Node.js, Express.js, React.js, Redux, Mongoose, Socket.io, REST APIs, JWT, MVC Architecture

Databases: MongoDB (Atlas), MySQL

Cloud & DevOps: AWS, DigitalOcean, Docker, Git, GitHub Actions, PM2, CI/CD

Core Competencies: Microservices Architecture, API Design, System Design, Agile/Scrum, Payment Gateway Integration, Cloud Infrastructure, Production Support

PROFESSIONAL EXPERIENCE

Senior Software Developer | BXI – Barter Exchange of India, Mumbai *Aug 2025 – Present*

- Lead end-to-end development of a production B2B platform as primary full-stack engineer, spanning REST API design, React.js frontend, MongoDB data modeling, and infrastructure management on AWS and DigitalOcean
- Architected multi-gateway payment flows (Razorpay, Pine Labs, HDFC, Yes Bank) — order creation, webhook processing, payment reconciliation, and failure recovery across the transaction lifecycle
- Built a role-based access control (RBAC) system with JWT authentication and refresh token rotation, securing access across buyer, seller, and admin roles
- Developed an admin dashboard with real-time order/transaction management, filterable report exports, and business analytics views
- Implemented multi-channel notifications (NodeMailer, MSG91, Firebase) integrated with order lifecycle events; managed cloud deployment, uptime monitoring, and incident resolution
- Collaborate directly with founders and cross-functional stakeholders to translate business requirements into technical specifications, owning architecture and technical decisions end-to-end

Software Developer | Odyssey Technologies, Mumbai *Jul 2023 – Jul 2025*

- Built and maintained 10+ RESTful APIs in Node.js/Express.js powering authentication and security workflows, accelerating feature delivery by 35%
- Implemented secure middleware for RBAC, JWT session validation, and route-level authorization across all protected endpoints
- Optimised React.js frontend components and rendering logic, reducing page load time by 25%
- Diagnosed and resolved CI/CD pipeline issues across staging and production, improving system uptime and release speed by 30%

PROJECTS

Complete Orbit — Multi-Tenant HR Platform

- Built a multi-tenant HR management system on the MERN stack with tenant-isolated data architecture, role-based access control, and RESTful APIs for employee, payroll, and org-management workflows

Personal Developer Portfolio *(Live — visit for additional projects)*

- Full-stack portfolio (React.js, Node.js/Express.js contact backend) with automated CI/CD via GitHub Actions, form validation, and zero-downtime deployment

EDUCATION

B.E. Computer Engineering | PVPPCOE, Mumbai University 2019 – 2023

CGPA: 9.09 / 10
